From the Principal

Save the Date: WE NEED YOU

Next year we have two very important evenings for all parents of STM:

1. Tuesday 2 February, 6.30pm. We are launching a skills based program called “MYTERN” to help students and families reduce the anxieties of 21st century life. This program needs parental support in order for its maximum potential to be reached with the students. The classroom teachers will be at this evening in order for you to meet and greet them after this presentation.

MYTERN teaches you to take control of your response to everyday stresses and challenges, helping you to keep emptying your glass so that it doesn’t become too heavy or feel impossible to hold. We cannot eliminate stress and challenges from our lives. Therefore, as a preventative strategy, MYTERN teaches people of all ages how to create health out of everyday stressors; tackling the problem at the ground level, so individuals don’t end up feeling overwhelmed, but in control.

Based on neuroscience and positive psychology, MYTERN is a time and cost effective resilience building intervention designed to teach individuals how to build their own emotional intelligence and resilience; increasing mental, physical and emotional health; teaching them how to take control of their overall wellbeing.

Child care will be provided (a G rated movie in the 5/6 area with 2 relief staff in attendance) and a food hamper for a lucky door prize.

2. Thursday 11 February 7.00pm. A cyber safety evening that will challenge and extend your own thinking and control over internet usage for your children. Cyber safety is a big issue at the moment and one that we take seriously at STM. Please pop this date and time into your calendar so that you can attend this very important free session.

Child care will be provided (a G rated movie in the 5/6 area with 2 relief staff in attendance) and another a door prize.

I genuinely urge you all to attend these two evenings as these programs will ensure that the teaching and learning for 2016 will start with a common understanding from parents and staff.

Carol Seagar
Principal
THINK U KNOW - Cyber Safety Presentation

On Thursday 11th February 2016 at 7.00pm we will have a speaker from Think U Know coming to talk to parents and staff about cyber safety for children. Cyber safety is a big issue at the moment and one that we take seriously at STM. Please pop this date and time into your calendar so that you can attend this very important free session.

CATHOLIC SCHOOLS INSTRUMENTAL MUSIC PROGRAM LAUNCESTON

THIS MUSIC PROGRAM IS AVAILABLE AT YOUR SCHOOL!

Why join another program when you can learn to PLAY WITH YOUR SCHOOL FRIENDS?

Would you like more information? Would you like an enrolment form?

See your Front Office now or visit: tinyurl.com/nsyd3f3

JOIN TODAY!
In October Grade 3/4 Morgan were fortunate to have a whole day learning and drawing about the Albatross with Mrs. Sandra Rein. The class all entered a competition with art pieces focusing on the Albatross. Four students, Melissa Woolridge, Charli Gillies. Campbell Mackenzie and Augustine Sullivan Arkless were chosen by the museum staff to have their work framed and be part of a special exhibition at the Queen Victoria Museum and Art Gallery. On Thursday the 4th December the children went to the opening of the exhibition with their parents and had a special afternoon tea. The children are pictured below standing next to their paintings.

The project is collaboration between landscape painter Richard Wastell, photographer Matthew Newton and scientist Dr. Rachael Alderman. Albatross Island is 18 hectares of a mixture of rock off the northern-western tip of Tasmania and is home to 5200 breeding pair of shy albatross. These birds are endemic to Tasmania and access to the island is highly restricted to help protect the breeding site.

The children learnt a couple of AMAZING FACTS:

- The shy Albatross will travel a great distant remaining almost exclusively at sea and may travel as far as South Africa during the first few years of their life. Shy Albatross begin returning to the colony of origin once they reach three or four years of age.

- The Shy Albatross will bond with their partner for life. They can live for over 30 years – these survivors will have many opportunities to breed, however, only a small fraction of the eggs laid by a female in her lifetime will survive the long process of incubation, chick rearing and the many challenges at sea to become a breeding Adult.

This unit of study highlighted and bought together the number of units we had studied throughout the year. For example our history unit whereby the first recorded visit to Albatross Island by Europeans was George Bass and Matthew Flinders when they circumnavigated Van Diemen’s Land. The unit also furthered understanding of Tasmania’s Geography and that humans are responsible for the two biggest threats to the shy albatross survival – interactions with fishing vessels and climate change.

I encourage all parents to take their children to our beautiful museums in Launceston to further their general knowledge of Tasmania. (Maybe something to do in the summer holidays.)

Denise Morgan
Catholic Schools in Northern Tasmania do not currently have access to system support services such as psychologists. However, Medicare benefits are available for a range of specified psychology services. Some of the services that your child may be provided for include:

- **Helping Children with Autism Program** - Under this program a child can be referred by a paediatrician or psychiatrist for diagnosis and treatment services such as psychologists, speech pathologists, occupation therapists, audiologists, optometrists or physiotherapists.

- **Better Start Program** - Children up to 15 years of age with any of the following disabilities: Sight impairment, Hearing impairment, Cerebral palsy, Down syndrome, Fragile X syndrome can receive support from allied health services.

- **Better Access Initiative** - Allied mental health services are available for children (and adults) with challenges (such as anxiety, ADHD, mood disorders) that significantly interfere with an individual’s cognitive, emotional or social abilities.

To access these support services please contact your GP. Please email Miss Noble on shaye.noble@catholic.tas.edu if you have any questions or require more information.

Please remember to inform your child’s class teacher if your child is accessing any of these services so that we can all work together to provide the best support for your child.
